

Job Title: Operations Analyst

C&Y Global Group California Inc. seeks an Operations Analyst to identify and solve issues relating to the performance of business operations, specifically in purchase planning and sales. Please send resume to resume@cyglobalusa.com

Operations Analyst Detailed Job Duties:

- (1) Formulate and apply mathematical modeling and other optimizing methods to forecast metal market price trends and purchasing strategies;
- (2) Collect transportation data, evaluate and analyze transportation for daily operations, and make optimal solutions and plans;
- (3) Analyze, assess, and adjust sales strategy to help achieve the sales plan according to market price and various objective factors;
- (4) Develop and implement a variety of software solutions for company's in-house decision support software systems.

Minimum requirements:

- (1) Bachelor's Degree in Statistics or Computer Science, or a related field
- (2) Twenty-four months of work experience as a data analyst or software developer in the nonferrous metal recycling industry (OPT experience is acceptable).
- (3) Established skills in data modelling tools such as Erwin and Power Designer and visual analytical tools such as Power BI, Tableau and OBIEE;
- (4) One year experience with SQL Servers, Oracle Analysis Services, and DBA
- (5) Proficient in Javascript frameworks (Angular, React or Vue.js), front-end technologies (HTML, CSS3 and Sass, JavaScript), C#, Java and the application of MVC frameworks (ASP.NET MVC or Spring)
